

Sustainable Development Goals

13 - Climate Action

13 CLIMATE ACTION

No country in the world is immune to the serious effects of climate change. Greenhouse gas emissions continue to rise and are now 50 percent higher than their levels in 1990. Moreover, global warming is causing long-term changes to our climate system, threatening irreversible consequences if we do not take necessary mitigation and adaptation actions today.

Sustainable Development Goals

13 - Climate Action

The Department of Radiology at the College of Health and Medical Technologies held a discussion session on radioactive pollution caused by oil and petroleum products. The session was presented by Professor Dr. Hana Ihsan Al-Baroudi, a faculty member at the university.
