10 - Reduced Inequalities

College: College of Law

Global inequality is increasing, with 1% of the world's population holding nearly half of the global wealth. Goal 10 of the Sustainable Development Goals aims to ensure equal opportunities by adopting legislation and following policies that improve living conditions for everyone in a sustainable manner. Special attention must be given to the most vulnerable countries, such as the least developed countries and small island developing states, particularly through directing financial flows to them.
